

:: LOCAL FEATURE DESCRIPTION :: Call Forwarding ::

Automatically forwards incoming call to any number you choose, including pager or mobile phones.

How to use

- To turn on **Press *72**. At the dial tone, enter the number to which you want your calls forwarded.
 - If the number you're forwarding to is a Toll Free number, or a long distance call, dial 1, the area code, and then the number*.
- Wait for the line where you are forwarding calls to pick up then you can hang up.
 - If the line is busy or doesn't answer, repeat the above process and it will be activated even if the line is busy.
- To turn off, **Press *73**.

**If you transfer calls to a location outside your local calling area, you are responsible for toll or long distance charges to wherever you are forwarding your calls.*
